

ThreadPrint

Enhanced Email Thread Printing for Microsoft Outlook

MANAGE CAPTURE RECOVER

Email is now the communication media of choice and there are many reasons why emails need to be printed. It is often unnecessary to print whole email conversations but it is difficult to print just the parts that you need, causing a lot of paper waste and significant printing costs.

ThreadPrint provides a simple and elegant solution to the problem: It provides an easy way to select threads from an email conversation and print just what you need; It includes a number of useful shortcuts to keep users working efficiently, such as printing only the latest thread at the click of a button; Users can also decide whether to include attachments when they print. **ThreadPrint** is a low cost solution which can easily be installed by your IT department.

ThreadPrint is economical, environmentally friendly and efficient.

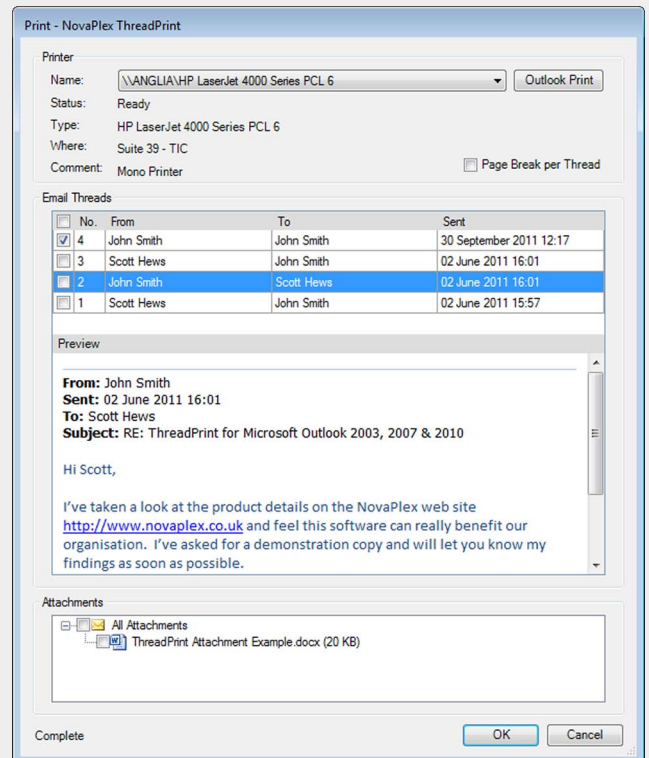

Key features

- Preview and print all or individual threads of an email
- Print email threads and attachments at the same time and to your preferred printer
- Print multiple emails with a single-click using the new Quick Print feature
- Supports nested attachments

Stop waste and save money

Did you know?

Paper consumption has doubled over the last 20 years. Even with the introduction of electronic filing systems people still print. So make email printing effective with **ThreadPrint** and help reduce cost and the impact we have daily on our environment.

Every firm can benefit using ThreadPrint,
saving £thousands per year
in paper, toner, electricity and
recycling costs
